

About Us

The Tri-Cities AGC is a non-profit membership organization of comprised of commercial general contractors, subcontractors, suppliers, insurance and bonding agents, lawyers, CPAs, and architects and engineers. We currently have approximately **140 local members** and we keep growing!

One of our main goals is to facilitate the construction process by acting as a central point of contact for information regarding a wide variety of construction projects in the Tri-Cities, Southwest Virginia, Western North Carolina, and the surrounding areas.

Plan Room Service

The Tri-Cities AGC offers a private plan room to our members that allows them to view plans and specs electronically, saving the cost and hassle of reproduction and distribution.

Our office also houses a physical plan room where plans and specifications are easily accessible for members desiring to take off quantities and submit quotations. These plans deal with commercial, industrial, public works, and governmental construction projects in the surrounding region.

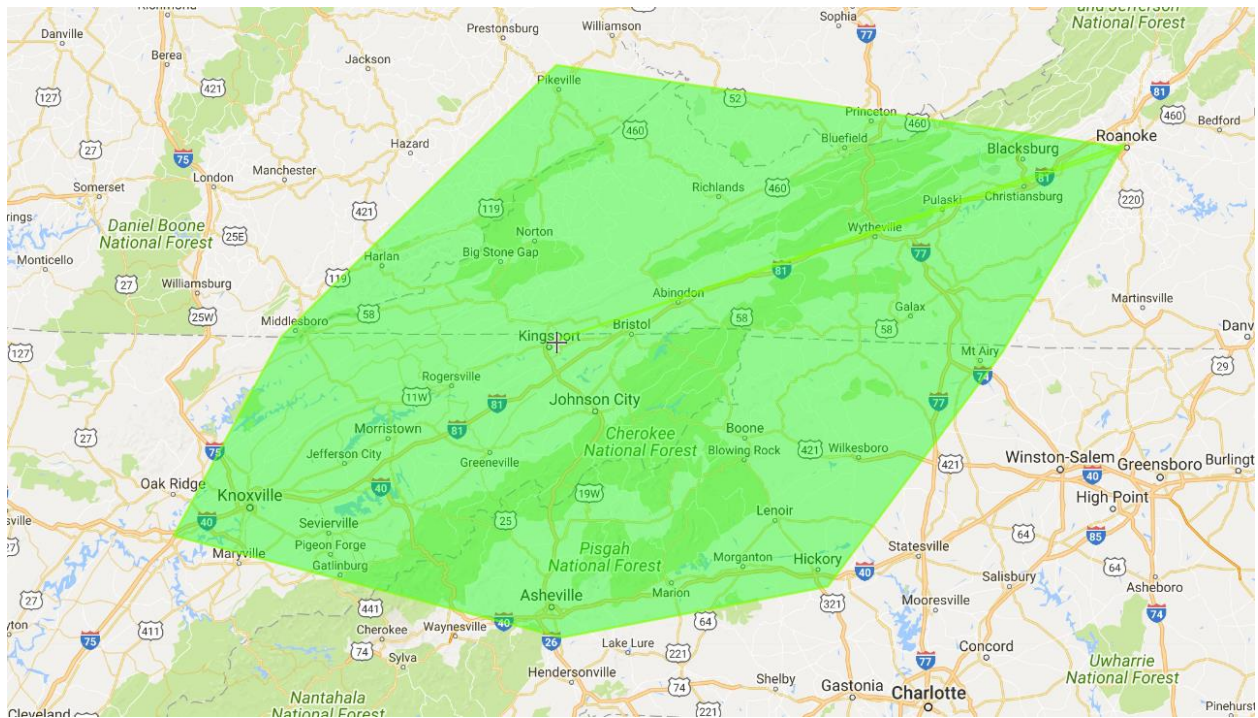

Construction Newsletter

Members of the Tri-Cities AGC receive a construction newsletter that lists current plans and specifications available, bid dates, addenda received, prospective, low and awarded bidders, etc.

The newsletter is normally distributed two to three times each week, but may vary according to the information available.

Areas Our Members Do Work:

Many of our members are licensed to do construction work in more than one state. We like to advertise a wide range of projects so that our members have more variety.

We will advertise your projects for FREE!

Advertising your projects with the AGC is a win-win situation for both of us. You benefit by receiving a wide range of bids that will hopefully keep you from having to re-bid the project. We benefit by being able to offer a wide variety of projects for our members to bid on.

Do you have projects that you would like to advertise to our members? Please contact the Executive Director, Allie Mullins at allie@tricitiestnagc.org
