

AGC Retirement Solution

About AGC

The Associated General Contractors of Tennessee is the leading voice in the Volunteer State for the construction and building industry with a special emphasis on the needs and objectives of the general contractor.

AGC has partnered with TAG Resources, LLC, and retirement heavyweights, Transamerica Retirement Solutions, LLC, and Mercer, LLC, to power the **AGC Retirement Solution**, an improved 401(k) with advanced technology for today's retirement needs – helping you make the most of your own 401(k).

Key Benefits of the AGC Retirement Solution

Pay Reasonable Costs: Because the AGC Retirement Solution is built on an “aggregated” model – your company gains the advantages of economies of scale in pricing.

Ease of Administration: TAG Resources performs 99% of the administrative duties required for a company to offer a 401(k) to their employees. This removes the administrative burden from company employees and executives so you can focus on what's most important — running your business.

Fiduciary Liability Protection: This retirement plan provides you with the comfort of knowing that your 401(k) is protected to the highest level allowed by law. This commitment by TAG Resources, gives you more peace of mind knowing that you are protected.

Well known and Substantial Partners: TAG is the largest “end to end” aggregate provider of 401(k) services in America. TAG partners with Transamerica Retirement Solutions, LLC, as Recordkeeper, with \$152 billion in assets under management, and with Mercer, LLC, as the Investment Manager, with over \$117 billion in assets under management.

Consistent Compliance: Historically, more than 67% of all 401(k) plans fail a Department of Labor random audit. However, plans administered as directed by TAG Resources have never failed an audit or fallen out of compliance. TAG is your 401(k) Department, signs the Form 5500, and ensures each plan is consistently in compliance with the DOL and IRS regulations. If you are out of compliance – TAG is out of compliance – and that has not happened in TAG's 15+ years of operation.
